

At NineDot Energy, we're proud to be at the forefront of the energy transition in downstate New York, championing community battery storage as a crucial way to facilitate broad access to clean energy solutions and bring renewable energy to the grid.

With sites in all phases of development across the New York City area, there's a lot to share from NineDot.

NY-BEST Capture the Energy

It was great for many members of the NineDot team to attend the [NY-BEST Capture the Energy conference](#) last week and engage with so many people working to bring battery storage to the New York City metro area.

We heard from New York State battery storage experts and leaders, including Doreen Harris, President and CEO of [NYSERDA](#), Rory Christian, Chair and CEO of the [New York Department of Public Service](#), Rich Dewey, President and CEO of [NYISO](#) and NineDot's Adam Cohen, Linda Tatlow and Jon Carbajal.

Every presenter emphasized how energy storage will be critical to achieving New York's ambitious climate goals, enhancing grid reliability and accelerating the transition to a clean energy future. From research to development to deployment, New York State is at the forefront of the energy storage industry, and NineDot is excited to play our part and help the grid overcome historical "kludges" with designs, projects and tariffs that support battery storage.

We are pleased to announce that **Adam Cohen, NineDot's CTO and co-founder, has been elected to the NY-BEST Board of Directors.** This recognition underscores Adam's dedication to advancing clean energy solutions. His leadership is well-known within the industry and we are excited to have Adam and all the newly elected board members get to work on shaping the future of energy storage and sustainability.

Batteries arrive!

This spring, NineDot reached an exciting milestone as batteries were delivered to several of our NYC battery sites.

Soon, these Tesla Megapack batteries will be ready to charge up and export power to the grid during times of peak demand, supporting a more resilient grid, reducing carbon emissions and improving environmental equity in the surrounding community.

NineDot in the news

ICYMI, SolaREIT, a solar and storage real estate investment company, announced \$13 million in real estate financing for NineDot's BESS projects. **This financing adds to our previously-announced capital base of approximately \$400 million, and shows how we are often able to purchase, not just lease, land for our battery storage sites.** [Learn how NineDot Energy works with landowners](#) to develop properties into valuable and important community-scale energy resources.

Working with sustainability advocates

While some New Yorkers have heard about battery storage, not many people have yet had a chance to see what a complete battery storage site is like. NineDot often invites different visitors to our Bronx site to convey the size, design and technical approach of a community-scale battery project. Several weeks ago, we hosted members of the [Urban Green Council](#) team, among others. Our guests had the opportunity to see firsthand how our innovative battery systems are designed to enhance the reliability and sustainability of our energy infrastructure.

NineDotters also attended the [Annual New York League of Conservation Voters Gala](#). We are deeply grateful for the opportunity to connect with so many individuals dedicated to fighting climate change. NineDot is proud to support and stand alongside an organization that prioritizes the environment and our future.

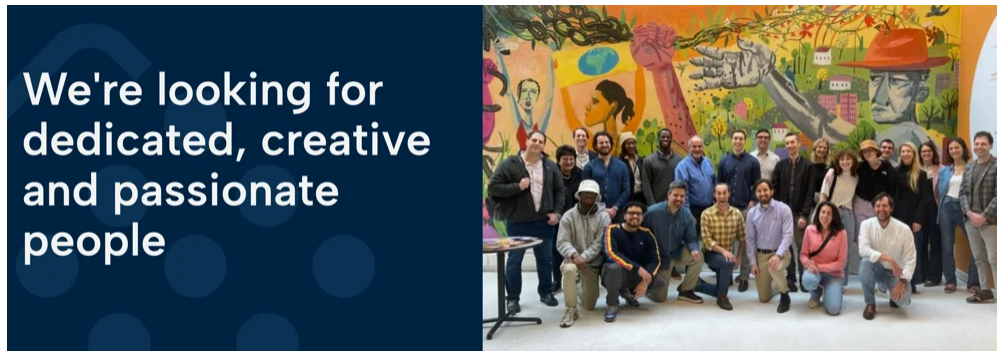

Upcoming events

NineDotters will be attending various events and conferences in the coming months, including the [ACP Energy Storage Conference](#) on June 26-28 in Portland, Oregon

and the [AEE-NY Gala](#) on June 20 and [NYSEIA 2024 NYC Solar + Storage Summit](#) on June 27 in New York City — [reach out to connect with us!](#)

We're hiring

Our team is growing! Check out our [updated website](#) for more information on current **open roles**:

[Chief Financial Officer](#)

[Construction Project Manager](#)

[Engineering Project Manager](#)

[General Counsel](#)

[Manager, Project Finance](#)

[Project Controls Manager](#)

[Senior Manager, FP&A](#)

In memoriam

With heavy hearts, NineDot shares the sad news that Gilles Guillon, our Chief Financial Officer, has passed away unexpectedly. Since joining our company in 2023, Gilles helped shepard our large equity raise, broadened the finance staff, engaged with a variety of financing partners, oversaw our audits and more — and he kept his sense of humor even at the most stressful times. We all miss him.
